EXPERIENCE

Apprentice

2022 – 2023

BC Technologies Corp.

Remote

- Maintained the production website for *FutureSphere Academy* using Next.js, PostgreSQL, and Tailwind CSS within an Agile development workflow.

EDUCATION

Harrisburg University of Science & Technology

Harrisburg, PA

Bachelor of Science in Computer Science

Aug. 2024 – June 2027

- Cumulative Average: 96.5% | Computer Science Average: 99%
- Awards: Deans' Honors List (2024 - 26)
- Relevant Coursework: Data Structures, Essential Algorithms, System Information & Design, Operating Systems, Programming Language Concepts & Paradigm, Formal Language & Automata Theory, SQL Database Design & Implementation

Adams County Technical Institute

Gettysburg, PA

Computer Networking

Aug. 2022 – May 2024

- Awards: 1st in Competitive Programming (SkillsUSA), Special Recognition (2023 Congressional App Challenge)

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, TypeScript, HTML/CSS — **Spoken:** English, Mandarin

Frameworks, Libraries & Runtime: React, Next.js, Flask, Quart, FastAPI, Tailwind CSS, shadcn/ui, Node.js

Backend & Data: Convex, Prisma, PostgreSQL, SQLite, MariaDB, Clerk

Tools, Platforms & OS: Git, GitHub, Docker, VS Code, PyCharm, IntelliJ, Claude Code, Postman, Vercel, DigitalOcean, Hetzner, Windows 10/11, Ubuntu

Certifications: CompTIA A+

PROJECTS

Fault Tolerance and External Storage for Dynamization Systems

C++

January 2026 – April 2026

- Extended a static-index dynamization framework with write-ahead logging, checkpointing, and an external ISAM tree to provide fault tolerance and persistent storage.
- Measured 99.36% lower insertion time than a B-tree in tests with OS caching disabled; the index's point lookups were 85% slower.
- Extended prior research on dynamic indexes; code: github.com/XoutDragon/dynamic-extension.

GuildLeaderboard — Hypixel SkyBlock Leaderboard

Next.js, Tailwind CSS

2022

- Contributed to the frontend of a production guild leaderboard that served the Hypixel SkyBlock community after Senither's leaderboard was discontinued.
- Built frontend features for browsing stats across 50K+ players and 1K+ guilds, using data collected by a teammate's automated bots.

Campus Connect (Stellic Pathfinder Challenge 2026)

React, TypeScript, Vite, Tailwind CSS, Convex

July 2026 – August 2026

- Collaborated in a 3-person team to build a campus platform combining student-faculty communication, course and club spaces, a marketplace, and a real-time event calendar.
- Used Claude Code to accelerate development, then debugged and adapted generated code to meet the platform's requirements.
- Code: github.com/XoutDragon/school-forums

Ratter Alert – Discord Community Safety Bot

Python, Flask, SQLite, HTML/CSS

2021 – 2022

- Built a bot and web interface to manage community-reported Discord accounts associated with remote access trojans (RATs), with data stored in SQLite.
- Reached 125 Discord servers before further expansion required platform approval; the project inspired a 110K-member server to build its own bot after Ratter Alert was discontinued.

Dynamic Extension in PostgreSQL

C, PostgreSQL

September 2026 – Present

- Developing a PostgreSQL extension that applies the dynamization framework to PostgreSQL indexing.
- Planning performance comparisons against PostgreSQL B-trees using TPC-H and TPC-C workloads.
